Thanks Kellon.

If you are curious at all the fire has definitely grown. More tanks involved now. On the good side we are not seeing much toxic chemical species in the plume. It's mostly carbon soot and particulates. That's what we expected from the beginning knowing the types of material on fire at the site. There would have to be something besides what the company has reported was in the tanks for us to find anything highly toxic.

Sir,

I gave you full access to PR-R6-19-00223 and included both Mr. Miller and Mr. Langett as well as cc'd and access to modify. Routing the PR up my chain of command now.

Very Respectfully,

//Electronically Signed//

Fire is even bigger today. You may want to consider making the amount a little larger. The IGCE has

a cell that adds a contingency on the total cost. Just increase the percentage on the contingency to get the total to roughly \$60K if you think it's highly likely they will want the plane through Thursday.

Yes sir, thought I would ask instead of assuming and creating the wrong PR.

Kellon,

Understood. As long as you know the contract number and OAS destination (Ross Miller and Eric Langett) then it's all about your internal Regional routing for approval. Every place seems to be slightly different.

Tim,

Good afternoon, my branch has a new process. I can initiate the PR for you, but you will have to get funding approval from Chris Petersen, Monica Smith or Bryant Smalley for my Budget Coordinator to process the request. I have all the documents that I need just the approval from a Branch Chief.

Very Respectfully,

Subject: RE: ASPECT response

Adam and Kellon,

See the attached files for the SOW and IGCE for the ASPECT deployment to Deer Park for the ITC tank fires. This is based on four days of flights including last night. If you think this will go longer give me a call and we can discuss how to modify the IGCE appropriately.

That works just fine Adam. It will be in the ball park and I will go with that.

Mgmt is asking to plan for utilizing the aspect mid day Today thru wed. So, a total of four events. As the incident is progressing, I don't foresee cutting that short, but then it could happen.

Apologies for not having a more firm estimate.

Gentlemen,
I do not currently have an estimate of the ASPECT deployment costs for this latest response. I thought we were done yesterday and it would have been pretty easy. The discussion now is for a longer term monitoring mission. If someone would give me a ball park estimate of the number of days the service is needed I will pull something

together to help get the PR ball rolling.
